

New Jersey has enacted a wonderful "Do not call" program. From my perspective and that of my family members as well, I can tell you we are much relieved by the absence of gross intrusions of outside sales interests. We had experienced daily intrusions and harsassments to the point of distraction. Those experiences made us angry and not at all receptive to their unwanted pitches. We feel strongly that no one has the right without our consent to reach into our family time. This is an unconscionable overreach into our "zone of rights."

I call on you to take a hands off stance and show proper respect for the actions our governor and legislative leaders have taken at our behest.

We DO NOT want our program eroded in any way.
